Our school was established in 1957 for Ukrainian national minority. In 2007 it received a patron – Bohdan Igor Antonycz. The patron of the school was a poet who described beauty of nature. He was also a precursor of ecological poetry. In our school there are about one hundred students at ages 13 – 19.

In the school the pupils learn following languages: Polish, Ukrainian, English and German. The rest of the subjects are taught in Polish language. The students are educated in a spirit of religious and cultural tolerance and they take part in domestic and international projects (ecological, historical, social, linguistic etc.). In our school there are groups of art (dance, theatre, choir, vocal). It also cooperates with voluntary organizations and conducts an active volunteer work. Thanks to cooperation with Ukrainian universities and schools the members of the school society have an opportunity to participate in chemistry and physics lectures. They can also take part in ecological and ethnographic classes.

The assets of our school are nice and friendly atmosphere, experienced teachers, safety and small groups of students. It has also a canteen, internet, a common room, a fitness club, and a modern computer study.

Our main goal is to prepare a student to live in modern Europe and on the other hand we care for education in respect for the history and cultural roots.
